URL [www.hotelillawarra.com.au](http://www.hotelillawarra.com.au)

## PHARMACEUTICALS

### ONLINE PHARMACY WEB SITE - II

This is a web-based e-commerce application created for a US based pharmacy. Patients can register to the site and order for prescription drugs. Physicians review the order and then approve, based on the medical history entered by the patient. Pharmacy then fill the order. The bottle label is generated through the site only. FedEx and DHL shipping API is integrated with the site to calculate shipping cost, generate shipping labels and track shipment. It also has the COD (Cash on delivery) functionality integrated. There is an option for the patients to easily refill their prescription.

#### Features

- Online Order with shopping cart and payment gateway
- Work-flow based prescription processing
- Role-based access for Customer service reps, Physicians and pharmacy personnel
- Easy order refill
- Integrated COD (Cash on Delivery) for FedEx and DHL
- Shipping Label generation, shipping cost calculation, optimal despatch location calculator, shipment tracking (for both FedEx and DHL)
- Configured to support multiple pharmacy web sites Using the same back-office

#### Technology

ASP.Net 2.0, MS SQL Server 2005, Ajax  
 URL <http://www.medsvianet.com>

## PHARMA

This is a technical informatics website. Admin can upload lots of books and products. General users can only see this product if they are not registered. After registration, they may also not be able to download or view this. Admin will give the permission to the user to view or download that file.

#### Features

- Admin can upload books, PDF, Product details, Flash Files
- User Registration.
- Adding permission to the links.
- Users are able to get that links if permission available.

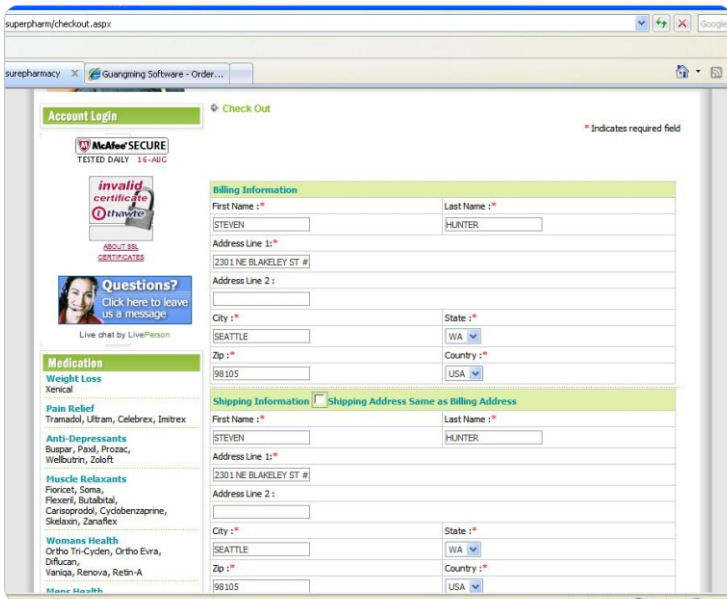

#### Technology

PHP, MYSQL

## INSURANCE APPLICATIONS

### ACCIDENT VEHICLE

This application focused on creating estimates and bills for an accident vehicle to claim insurance. This has several master screens to enter vehicle, parts, insurance company, financier, division, agent, surveyor etc.. To make an estimate user need to select informations from master tables like vehicle model, type, parts needs to be replaced, labour charge, oil charge etc. beside this user also needs to input vat, service tax etc.. All calculations are done at backend and a report of total estimate/bill will be generated. After a new estimation, if required supplementary estimations can also be added which is automatically incorporated at the bill.

#### Features

- User friendly admin panel.
- Separate Login and Status updates for Insurance Company.
- Auto Mailing system that mails the estimate and bill for a particular vehicle to customer, financier, insurar.
- Facility to add supplementary estimation.
- Generate and print bills with a single mouse click.

#### Technology

ASP.Net 2.0, MS SQL Server 2005, C Sharp.Net, rdLc Reports.
