PROPERTY RENTAL WEBSITE

Online market place for property owners to rent their properties on gameday. The site is created keeping the university football fans in mind, but can be easily customized to suit any kind of property rental website. There are two type of property owners, companies and individual owners. The property owners create their listing on the site and the fans can book the property online through this site. The site has different type of membership for different type of listings (featured, standard, unlimited listing etc.). The site also has the paypal authorize and capture methods integrated so that the renters' account is not debited unless the owner accepts the payment. Google Maps API is integrated with the site for easy identification of an address.

Features

- Member signup and profile management
- Payment Gateway integration including capture and void functionality
- Property creation and management
- User feedback system (including a rating system)
- Admin panel to approve/decline a posting and also Maintain the master data.
- Google maps API integration including geocoding.
